Professional Summary

B.Tech student with a **9.05 CGPA** and **300+ DSA problems solved** across LeetCode, GeeksforGeeks, and other platforms. Skilled in developing **full-stack and AI-powered applications** using React.js, Node.js, Express.js, MongoDB, and PostgreSQL. Strong understanding of data structures, algorithms, OOP, DBMS, authentication, database design, and **scalable backend development**.

Experience & Training

Full-Stack Developer — NK Enterprises June–August 2026

- Engineered a **full-stack MERN e-commerce application** to transition an offline retail store online, enabling product discovery, secure cart management, and dynamic SEO metadata.
- Integrated **Razorpay API** for digital payments and built an admin panel for inventory and order tracking, **improving order processing efficiency by 40%**.
- Optimized performance using debounced search and **React.lazy code splitting**, achieving a **1.5s initial page load**; authored Jest, Supertest, and Vitest test suites with **90%+ coverage** across critical flows.

Industry Training in AI & Machine Learning — Winovation Services Pvt. Ltd. May–July 2025

- Gained hands-on experience with Python, OOP, NumPy, and Pandas; built and evaluated supervised and unsupervised ML models, including clustering and hyperparameter tuning.
- Evaluated **8 ML models on 185 monthly records** and deployed the forecasting system via Dockerized Streamlit. Optimized **170+ hyperparameter configurations** with Optuna Bayesian Optimization, achieving a **41.7% R^2 improvement** and **RMSE reduction** over the linear baseline.

Projects

ProResume AI — AI-Powered Resume Ranking System Live Demo

- Built an **AI-powered resume analyzer** that evaluates resumes using keyword matching, skill relevance, and ML-based ranking, generating quantified ATS scores and actionable feedback.
- Developed a **weighted scoring algorithm across 5 dimensions** normalizing AI evaluations into a **100-point career score**. Integrated real-time LinkedIn job matching with **3.3s average latency** and optimized Vite builds to **70.35 KB gzipped**.

OutSkill — Automated Email Queue & Slack Dispatcher Live Demo

- Built a **BullMQ + Redis asynchronous email system** handling **1,000+ jobs across 15 concurrent workers**, with exponential retries and automatic recovery of interrupted jobs.
- Implemented **Redis rate limiting (100 emails/hr/sender)** with automatic job postponement and **Slack OAuth 2.0 alerts**, plus resilient third-party API handling.
- Optimized **12 REST APIs** with Prisma indexing/eager loading and built **Elasticsearch → PostgreSQL failover**.

Reel Food — Short-Video Food Ordering Platform Live Demo

- Engineered a **full-stack food discovery and ordering platform** with a **60 FPS reels feed**, restaurant discovery, cart, checkout, and payment-gateway integration, backed by secure JWT authentication, REST APIs, MongoDB/Mongoose, Bcrypt, and ImageKit.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design

Frontend: React.js, Vite, Tailwind CSS, Shadcn UI, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, HTTP-only Cookies, Bcrypt, Redis

Databases: MongoDB, Mongoose, PostgreSQL, Prisma ORM

AI / ML: Machine Learning, NLP, OpenAI API, NumPy, Pandas, Matplotlib

Tools: Git, GitHub, Vercel, ImageKit, Zod, Payment Gateway Integration, Docker

Education

B.Tech, Computer Science & Engineering — Bhagwan Parshuram Institute of Technology, Delhi 2023–2027
